Synoptic Operative Note – Ventral Hernia Repair

Patient Information

Field	Entry
Patient Name:	
Date of birth:	
Age:	
Sex:	
Weight:	
Heght:	
BMI:	
ASA Score: *(Include description of classes)*	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Preoperative Information

Surgeon:	[Enter Surgeon Name]
Assistant:	1. [Enter Assistant Name] 2. [Enter Assistant Name]
Anaesthetist	[Enter name]
Duration of operation (min):	[Enter time in minutes]

Indication for Surgery

- ☐ Symptomatic primary ventral hernia
- ☐ Symptomatic incisional hernia
- ☐ Recurrent hernia
- ☐ Incarceration
- Other: _____

Operative Findings

- Hernia type: ☐ Umbilical ☐ Epigastric ☐ Incisional ☐ Spigelian ☐ Other:_____
- Site of hernia: Upper midline ☐ Lower midline ☐ Umbilical/paraumbilical ☐ Subcostal ☐ Pfannesteil ☐ Grid iron / Lanz ☐ Parastomal ☐ Previous stoma ☐ Spigelion ☐ Lumbar hernia ☐ Laparostomy ☐ Other _____
- Total hernia defect size: _____ cm (length) x _____ cm (width)
- Number of defects: _____
- Contents: ☐ Omentum ☐ small Bowel ☐ Colon ☐ Stomach ☐ Pre-peritoneal fat ☐ Other: _____
- Strangulation/Ischaemia: ☐ Yes ☐ No
- If recurrent hernia. Does patient have a mesh in situ? ☐ Yes ☐ No ☐ unknown

---

Operative Approach

- ☐ Open repair
- ☐ Laparoscopic repair
- ☐ Robotic repair
- ☐ Laparoscopic converted to open
- ☐ Other _____

- Diagram (Access ports and incisions)

- *must be able to mark the following on the diagram:*
  - *Ports and size -* *5mm*
    10/11mm
    12mm
    15mm
  - *Stoma site* *ileostomy*
    Colostomy
  - *Access incision*

- 
Procedure Details

Dissection:

- Sac excised ☐ Yes ☐ No
- Pre-peritoneal fact dissected off sheath ☐ Yes ☐ No
- Hernia defect closed ☐ Yes ☐ No

Repair Type:

- ☐ Primary suture closure (non-mesh)
- ☐ Mesh repair

Mesh Details (if applicable):

- Type: ☐ Onlay ☐ Inlay ☐ Sublay (retromuscular) ☐ Underlay (IPOM)
- Mesh material: ☐ Synthetic ☐ Composite ☐ Biologic
- Size: _____ x _____ cm

- Fixation: ☐ Sutures ☐ Tackers ☐ Trans-fascial sutures ☐ Glue ☐ Other _____

Primary Tissue repair (if applicable):

- ☐ Simple fascial suture
- ☐ Sheath overlap
- ☐ Component separation
- ☐ Other _____
-

Intraoperative Complications

- ☐ None
- ☐ Bowel injury
- ☐ Serosal tear
- ☐ Bleeding
- Other: _____

Haemostasis & Closure

- Haemostasis: ☐ Achieved ☐ Not applicable
- Drain: ☐ None ☐ Yes → Site: _____, Type: _____
- Fascial closure: ☐ Yes ☐ No
- Skin closure: ☐ Sutures ☐ Staples ☐ Glue ☐ Other

Specimen Sent: ☐ None ☐ Hernia sac ☐ Other: _____

Additional Notes

_____

_____

_____

Post operative Management
